

Project Takeover and Rescue Agreement

Agreement _____ · Date _____

1. Parties

This agreement is between **PandaDev** ("the Studio", support@pandadevhub.com) and _____ ("the Client", _____).

2. The project being taken over

- **Site or app:** _____
- **Built by:** _____ (the previous developer)

3. Step 1: audit

The Studio reviews the code, hosting, security and open problems and sends a written report within _____ business days, with a list of fixes and a price for each.

- **Audit fee:** \$_____, due on signing.

4. Step 2: fixes

The Client chooses which fixes to go ahead with. Each one is confirmed by a Change Order or Statement of Work before work starts, and charged at its quoted price or at **\$65 per hour**.

5. What the Client provides

Access to the code, hosting, domain, app store and any other accounts the Studio needs, and any documentation from the previous developer. The Client confirms it has the right to give the Studio this access and to have the code changed.

6. Existing problems

The Studio is responsible for the work it does, not for problems in the existing code, hosting or data that were there before it started, including security issues it finds during the audit. The Studio tells the Client straight away about any serious security problem it finds.

7. Governing law

This agreement is governed by the laws of the place where the Studio is registered. Electronic signatures are binding.
